Journal of Elasticity **58:** 283–284, 2000.

Contents of Volume 58 (2000)

Volume 58 No. 1 2000

Special Invited Exposition
"A Primer in Elasticity"
by
Paolo Podio-Guidugli

Foreword, by Roger Fosdick vii

Preface, by Paolo Podio-Guidugli ix

Chapter I **Strain**
1. Deformation. Displacement 1
2. Rigid Deformations. Pure Strains 7
3. Strain Measures 11
4. Small Strain 14
5. Simple Deformations 17
6. Divergence Identities 19

Chapter II **Stress**
7. Forces. Balances 25
8. Stress. Dynamical Processes 30
9. Simple Equilibrium Solutions. Normal and Shear Forces 32
10. Alternative Forms of the Basic Balance Laws 35
11. Power. Stress Power 38
12. Exact and Linearized Equilibrium Theories 40

Chapter III **Constitutive Assumptions**
13. Linearly Elastic Materials 47
14. Material Symmetry 51
15. Fourth-Order Tensors 54
16. Problems of Classification and Representation 56
17. Internal Constraints 60
18. Constraints and Material Symmetry 65
19. Interpretation of Material Moduli 70

Chapter IV **Equilibrium**
20. Classical, Strong, and Weak Formulations 75
21. Variational Formulation. The Principle of Minimum Potential Energy 80
22. Minimum Complementary Energy. Variational Principles 84
23. Compatible Field and Boundary Operators 90
24. Generalized Boundary Conditions 93
25. Elastic Equilibrium with the Cauchy Relations 96
26. Elastic Equilibrium in the Presence of Internal Constraints 98
